

Bachelor of Science in Optical Sciences and Engineering[†]

College of Optical Sciences

Mapping of Courses and Activities to Program Outcomes

Program Outcomes							
H = High M = Medium L = Low ✓=External to OSE	Have a good understanding of the basic physics and mathematics underlying optical phenomena and optical systems	Are able to apply their understanding of physics and mathematics to solve technical and engineering problems	Are able to effectively use optical components, optical and electronic instruments, and computers to perform experiments and do testing in an optics laboratory	Are able to work effectively in teams to solve engineering and design problems	Are able to design optical systems and components as needed in their professional careers	Are able to effectively communicate with others both orally and in writing	Understand their professional and ethical responsibilities as engineering or scientific professionals
