Wyant College of
OPTICAL SCIENCES

2021 SPRING
COMMENCEMENT
Congratulations Wyant College of Optical Sciences Class of 2021! Today we recognize and honor your accomplishments and success in pursuit of your degrees. And your extraordinary commitment and resilience in completing your studies despite the challenges of the COVID-19 pandemic. Whether your degree is a Bachelor of Science, Master of Science, or Doctorate, you are all at an exciting point in your lives as you prepare to launch the next phase of your careers.

You will be joining a remarkable community of alumni of the Wyant College of Optical Sciences that is now nearly 3200 degrees strong, together comprising a major portion the backbone of the optics and photonics expertise and industry in the USA. You’ll find that they will welcome you and support your continued success.

The opportunities in Optics and Photonics continue to expand at astounding pace. Your careers will span from fundamental discovery in the mysteries of quantum optics to life-saving advances in biomedical optics; from satellite imaging and unmanned space probes to nanoscale printing for next-generation integrated circuits; from 3D sensing for autonomous systems to architecting the future quantum internet; from unprecedented optical sensors to crafting the largest telescopes in the history of mankind.

In your lifetimes you will imagine and innovate solutions that today appear impossible. You will discover things that we cannot even imagine today. Yet it is your engagement as a whole person, both professionally and in your private lives, that will define you. And as your career comes into focus, I’m sure that you will reflect and give back to the community that has supported your success by using your remarkable talent, insight, and collegiality to improve the world for those around you.

You will indeed be Lighting Our Future!
