The University of Arizona's rigorous COVID-19 guidelines and testing requirements have helped to keep transmission rates low. Student attendees of these in-person ceremonies will be required to abide by certain guidelines to keep other students, staff, and the Tucson community as safe as possible.

By participating in this graduation ceremony, you agree to the following:

- Students must take a COVID-19 antigen or PCR test through the University of Arizona testing system within 72 hours of the beginning of the ceremony and must have a negative result prior to the event or have an approved exemption (e.g. recent past infection, vaccination). Testing will be available in Tucson, Phoenix (limited hours), and Sierra Vista (limited hours). More information about the testing process and exemptions will be available on the website and distributed via email.
  - Students who do not have a negative test result within the stated timeframe will not be allowed entry.
  - Students who are two weeks post-second/final dose of the COVID vaccine and have uploaded their vaccination record to Campus Health will not be required to test.
  - Students who have had a positive PCR or antigen test result between 14 and 90 days prior to the ceremony will not be required to test. If the positive test result is from an off-campus testing location, documentation must be uploaded to Campus Health and verified.
  - See Mandatory Student Testing for Spring 2021 for more information about mandatory testing and exemptions.
- Students must wear a mask for the duration of the ceremony. There may be moments when a mask can be removed, such as professional photos while you cross the stage. These moments will be made clear to you prior to you removing your mask.
- Students will remain physically distanced from others. Chairs will be distanced and it is expected that students respect and maintain space.
- The CDC does not recommend traveling at this time. If you decide to travel, please follow the CDC guidelines for Travel During COVID-19.

☐ I agree that I have read and will observe the above COVID-19 ceremony guidelines.
